Overview

DTrans is a technology company focusing on custom software development, web design and networking/telecom solutions & maintenance. Founded by seasoned entrepreneurs with a background in creating long term value. The company has a very strong engineering team and visionary leadership team, which is the core of the company. The company has potential and experience in development of complex solutions for its valued customers

How we work

Design

Together we will range your project requisites and identify which ideas hold the most water, before creating the roadmap for the project that ensures the best possible chance of success and future vigours.

Testing

We focus on the functional requirements of your service and its quality, from the eyes of your users which stands along with the industry standards. We finely do the quality assurance of the software by giving importance to the fine touch.

Development

Our specialist team will generate the best suites software solutions for your requirements, utilizing evolving technologies to plug gaps in your current digital environment.

Deployment

We provide a single point of accountability, outlining roles, responsibilities, and key stakeholder relationships. Our works are transparent, that you can always watch the progress of the work from the beginning to the deployment.
